

## Department of the Army, DoD

## § 634.26

(ii) A rear view mirror will be attached to each side of the handle bars.

(iii) Approved protective helmets, eye protection, and highly reflective clothing or vests will be worn by operators and passengers when in operation.

(2) Restraint systems.

(i) Restraint systems (seat belts) will be worn by all operators and passengers of U.S. Government vehicles on or off the installation.

(ii) Restraint systems will be worn by all civilian personnel (family members, guests, and visitors) driving or riding in a POV on the installation.

(iii) Restraint systems will be worn by all military service members and Reserve Component members on active Federal service driving or riding in a POV whether on or off the installation.

(iv) Infant/child restraint devices (car seats) will be required in POVs for children 4 years old or under and not exceeding 45 pounds in weight.

(iv) Restraint systems are required only in cars manufactured after model year 1966.

(3) Headphones and earphones. The wearing of headphones or earphones is prohibited while driving a U.S. Government vehicle, POV, motorcycle, or other self-propelled two-wheel, three-wheel, and four-wheel vehicles powered by a motorcycle-type engine. This does not negate the requirement for wearing hearing protection when conditions or good judgment dictate use of such protection.

(d) Only administrative actions (reprimand, assessment of points, loss of on-post driving privileges, or other actions) will be initiated against service members for off-post violations of the installation traffic code.

(e) In States where traffic law violations are State criminal offenses, such laws are made applicable under the provisions of 18 U.S.C. 13 to military installations having concurrent or exclusive Federal jurisdiction.

(f) In those States where violations of traffic law are not considered criminal offenses and cannot be assimilated under 18 USC, DODD 5525.4, in appendix C to part 634 expressly adopts the vehicular and pedestrian traffic laws of such States and makes these laws applicable to military installations having concurrent or exclusive Federal ju-

risdiction. It also delegates authority to installation commanders to establish additional vehicular and pedestrian traffic rules and regulations for their installations. Persons found guilty of violating the vehicular and pedestrian traffic laws made applicable on the installation under provisions of that directive are subject to a fine of not more than \$50.00 or imprisonment for not more than 30 days, or both, for each violation (40 U.S.C. 318c). In those States where traffic laws cannot be assimilated, an extract copy of this paragraph and a copy of DODD 5525.4 in Appendix C, will be posted in a prominent place accessible to persons assigned, living, or working on the installation.

(g) In those States where violations of traffic laws cannot be assimilated because the Federal Government's jurisdictional authority on the installation or parts of the installation is only proprietary, neither 18 U.S.C. 13 nor the delegation in appendix C to part 634 will permit enforcement of the State's traffic laws in Federal courts. Law enforcement authorities on those military installations must rely on either administrative sanctions related to the installation driving privilege or enforcement of traffic laws by State law enforcement authorities.

### SECTION II—TRAFFIC LAW ENFORCEMENT

#### § 634.26 Traffic law enforcement principles.

(a) Traffic law enforcement should motivate drivers to operate vehicles safely within traffic laws and regulations and maintain an effective and efficient flow of traffic. Effective enforcement should emphasize voluntary compliance by drivers and can be achieved by the following actions:

(1) Publishing a realistic traffic code well known by all personnel.

(2) Adopting standard signs, markings, and signals in accordance with NHSPS and the Manual on Uniform Traffic Control Devices for Streets and Highways.

(3) Ensuring enforcement personnel establish courteous, personal contact with drivers and act promptly when driving behavior is improper or a defective vehicle is observed in operation.

## § 634.27

## 32 CFR Ch. V (7–1–02 Edition)

(4) Maintaining an aggressive program to detect and apprehend persons who drive while privileges are suspended or revoked.

(5) Using sound discretion and judgment in deciding when to apprehend, issue citations, or warn the offender.

(b) Selective enforcement will be used when practical. Selective enforcement deters traffic violations and reduces accidents by the presence or suggested presence of law enforcement personnel at places where violations, congestion, or accidents frequently occur. Selective enforcement applies proper enforcement measures to traffic congestion and focuses on selected time periods, conditions, and violations that cause accidents. The military services use selective enforcement because that practice is the most effective use of resources.

(c) Enforcement activities against intoxicated driving will include—

(1) Detecting, apprehending, and testing persons suspected of driving under the influence of alcohol or drugs.

(2) Training law enforcement personnel in special enforcement techniques.

(3) Enforcing blood-alcohol concentration standards. (See § 634.34.)

(4) Denying installation driving privileges to persons whose use of alcohol or other drugs prevents safe operation of a motor vehicle.

(d) Installation officials will formally evaluate traffic enforcement at least once a year. That evaluation will examine procedures to determine if the following elements of the program are effective in reducing traffic accidents and deaths:

(1) Selective enforcement measures.

(2) Suspension and revocation actions.

(3) Chemical breath-testing programs.

### § 634.27 Speed-measuring devices.

Speed-measuring devices will be used in traffic control studies and enforcement programs. Signs may be posted to indicate speed-measuring devices are being used.

(a) *Equipment purchases.* Installations located in States having a formal training and certification program will purchase the same brand and model of

equipment used by the State and will ensure operators attend an appropriate training program. Otherwise, equipment in appropriate Service or DLA tables of allowances will be used.

(b) *Training and certification standards.* (1) The commander of each installation using traffic radar will ensure that personnel selected as operators of such devices meet training and certification requirements prescribed by the States in which the installation is located. Specific information on course dates, costs, and prerequisites for attending may be obtained by contacting the State agency responsible for police traffic radar training.

(2) Installation commanders located in States or overseas areas where no formal training program exists, or where the military personnel are unable or ineligible to participate in police traffic radar training programs, may implement their own training program or use a selected civilian institution or manufacturer's course.

(3) The objective of the civilian or manufacturer-sponsored course is to improve the effectiveness of speed enforcement through the proper and efficient use of speed-measurement radar. On successful completion, the course graduate must be able to—

(i) Describe the association between excessive speed and accidents, deaths, and injuries, and describe the traffic safety benefits of effective speed control.

(ii) Describe the basic principles of radar speed measurement.

(iii) Identify and describe the Service's policy and procedures affecting radar speed measurement and speed enforcement.

(iv) Identify the specific radar instrument used and describe the instrument's major components and functions.

(v) Demonstrate basic skills in calibrating and operating the specific radar instrument(s).

(vi) Demonstrate basic skills in preparing and presenting records and courtroom testimony relating to radar speed measurement and enforcement.

(c) *Recertification.* Recertification of operators will occur every 3 years.
